data

Howleyda
Just created this forum to discuss how cool MindTouch Deki is. Please provide your thoughts!
SteveB
Damien, this is some pretty nifty scripting you've done! It nicely shows the benefits of the Deki platform with a fully web-accessible API. Keep it up!
rion
Tomorrow morning Aaron and I will be running 12 miles with west coast road runners.
Howleyda
Good Luck
Howleyda
check out my new blogpost at http://blog.developer.mindtouch.com/...-the-deki-api/
coreyg
Nice implementation...good job
irenev
This rocks Damien!!!

Howleyda
The threads currently stop at 3 levels deep. This setting is configurable in the script and can limitless if desired.
Howleyda
Also, with the addition of page notification in lyons users can subscribe to all the changes that take place in a discussion forum.
cornice
Very interesting. There's a lot that can be done with this approach.
cornice
The /Code page doesn't seem to be viewable.
Howleyda
Hey cornice, give it a shot now.
lktest
This is fantastic!
jgable
I assume this will be a new part at the top level

giulio
WoW!
giulio
Have been in Montreal, Quebec City and tour of Gaspesie...wonderful! Greeetings from Italy!
vdaron
Still fun !
cornice
That works. Thank you. By the way, I know this isn't the correct forum but is there any way to view the page source for a Deki page? I don't mean the HTML. I mean as if I had the rights to edit the page. If not, this would be a great feature for developer.mindtouch.com. All too often I want to see how something is accomplished but the code for the page isn't always posted. Take the right side of this page for example. ;-)
jger
test
Guerric
damien your page broke, "/content/body/div[1]/div[4]/span, function 'wiki.contributors' failed (click for details)"
Howleyda
Thanks Guerric, works fine for me.
Howleyda
Thanks for the good luck wishes
Howleyda
Thanks
beezoboy
Very Cool!
rberinger
Nice
hmarques
sdfsdf
giulio
damien, I'd like to send the data to the talk page so I'll try and modify the dekiscript...really a great job!
giulio
Ok, done...but in the meanwhile found a little bug, I'll report it
giulio
Here is the bug... http://bugs.developer.mindtouch.com/view.php?id=6028
Howleyda
excellent idea. The nice thing about this script is that all you have to do is change the dpath input value and you're all set. I'll check out the bug you filed. Thanks for your input.
giulio
Here the working dpath code:

```
{{web.UriEncode(web.UriEncode('Talk:'..page.path))}}
```

pratheesh
neat
coreyg
this is interesting
coreyg
yep
Howleyda
what is interesting Corey?
neilw
The approach taken here is very clever, and undoubtedly applicable to a variety of applications. Well done!
Howleyda
thanks neilw. I have some updates coming soon. some nice new features that I've been working on.
coreyg
How easy it is to use this :)
DocDuck
Strangely enough, this only seems to work with FF (not with IE7) in my installation. I'm testing with IE here...
Howleyda
hmmmm, I'll have to do further testing
Howleyda
I'm in IE8 right now. lets see if it all works
elbat

if you want to put the data in a talk page use this string. It will also work if you are in a user page.
